Overview

Welcome home to this tranquil retreat in the coveted Stonecreek subdivision! Enjoy picturesque views of roaming deer from various vantage points including the covered front porch, back terrace, and kitchen (washing dishes just became so enjoyable!). Your serene views are complimented by a comfortable layout with four bedrooms upstairs and a fifth non-conforming bedroom in the finished basement. An additional walk-out room downstairs provides ample storage for lawn care equipment, ensuring your yard stays pristine. Loved for more than 17 years, sellers are ready to hand this piece of art to you to make your very own.
